MITIGATION STRATEGIES TO REDUCE SALTWATER INTRUSION

PROJECT DURATION
2019 - 2021

ERDF
2.208.817,31

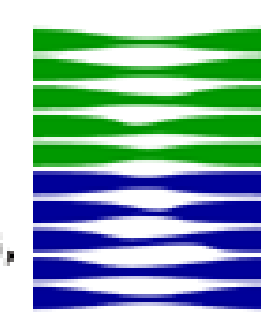

TOTAL BUDGET
2.598.608,61

DESCRIPTION

MoST project aims to test solutions against saltwater intrusion, a worldwide problem exacerbated by human activities and climate changes. Detailed data collection and field surveys are carried out and pilot sites are established to verify the efficiency of possible countermeasures, whose implementation is driven by laboratory experiments. Numerical models allow us to analyze laboratory and field results and to forecast different scenarios.
